## PROJECTS

### To-Do List

- **HTML | CSS | JS | REACTJS**
- I've created a dynamic day planner app using React, featuring an efficient todo list to help users stay organized throughout the day.
- The website features a fully responsive design with a clean and user-friendly interface.
- The application allows users to add, manage, and track their tasks efficiently. [Github](#)

### GitHub Finder

- **HTML | CSS | REACTJS**
- Developed a Git Finder by using HTML, CSS, JAVASCRIPT, and Reactjs.
- Built a user-friendly GitHub account finder with ReactJS for seamless user experiences. .
- Utilized the GitHub API to fetch and display user data such as user name, followers, and public contributions. [Github](#)

### Weather App

- **HTML | CSS | JAVASCRIPT | REACTJS**
- Developed a Weather App by using HTML, CSS, JAVASCRIPT, and Reactjs.
- In this app, users can search for the weather forecast of any city.
